Skills Training Courses (in English)

Ensuring workplace safety and compliance with laws and regulations are essential responsibilities for companies. However, there are many cases in which training content is not fully understood due to language barriers.

Our association offers training courses specifically for foreign workers (technical training and special education), in which dedicated interpreters translate lectures given by Japanese instructors into multiple languages. Take advantage of our multilingual training courses to support the development of foreign personnel who can work safely.

Method | Interpreters translate lectures into English

Material | Textbook , PPT material

Exam | Written exams in English, Practical skill tests assisted by interpreters

〈Training Schedule for 2026〉
